Biography

Dr. GO crafts immersive electronic soundscapes at the intersection of space-ambient atmosphere and modern synthwave energy. Drawing influence from pioneers like Jean-Michel Jarre and Paul van Dyk, his production is clean, modular and editor-friendly, with tracks structured for easy 30 and 60-second cut-downs. Pulsating arpeggios, ethereal pads and non-lyrical vocal textures give the music a global, language-free appeal.

Dr. GO is the music project of Prof. Dr. Gunther Olesch from Detmold, Germany. Since 2023 he has released seven albums, from One Horizon to New Start (2026). His music has been performed at Sternenmusik 2.0 and 2.1 at the Zeiss Planetarium Bochum and reviewed by music blogs across Europe and the USA.

At a glance
